

Capability Statement

RED EDGE RESOURCES

Overview

Red Edge Resources is a premier provider of advanced mining and construction technology solutions, specialising in the installation, servicing, and support of precision equipment. With an unwavering commitment to customer satisfaction, innovation, and reliability, we empower our clients to enhance safety, streamline operations, and maximise productivity.

Core Capabilities

Precision Technology Installation

- o Authorised distributors and experts in the installation of MOBA and Hemisphere machine control systems, as well as Webbair safety solutions for mining and construction machinery.
- o Tailored integration of solutions to meet specific client needs.
- o Comprehensive system setup and calibration to ensure optimal performance.

Equipment Service and Maintenance

- o Scheduled maintenance programs designed to extend equipment lifespan and maintain peak performance.
- o Onsite and remote troubleshooting and repair services to reduce downtime.
- o Equipment upgrades and retrofitting to modernize existing machinery.

Technical Expertise and Training

- o A team of certified technicians with extensive expertise in machine guidance and safety system technologies.
- o On-site training programs to help users maximize the potential of installed systems.
- o Dedicated support teams for seamless implementation and ongoing technical assistance.

Client-Centric Solutions

- o Value-added features such as monitoring systems and data analytics integration.
- o Flexible pricing models, including promotional offers, rebates, trade-ins, and rent-to-purchase options.

Key Achievements

Integrating advanced machine control and safety systems, driving enhanced precision and productivity across diverse industries.

Innovative Leadership

A highly skilled team of technicians committed to delivering superior installation and support services.

Experienced Team

Scalable operations that meet rising client demands while maintaining exceptional service standards.

Rapid Response

Commitment to Quality

At Red Edge Resources, we prioritise safety, efficiency, and reliability in every project. Our dedicated team is committed to exceeding industry standards and building enduring client relationships through consistent, high-quality service delivery.

Industries Served

Mining

Elevating precision and safety in excavation with cutting-edge machine control and safety technologies.

Construction

Improving accuracy, efficiency, and safety through state-of-the-art machine technology systems.

Infrastructure

Supporting large-scale projects with robust, dependable technological solutions.

Products and Solutions

Entry-Level Machine Control (Hemisphere):

Excavators, Dozers, Scrapers, and Wheel Loaders.

Premium Machine Control (MOBA):

Excavator 2D & 3D, Dozer 3D & Auto, Paving 2D & 3D, and Wheel Loader Scales.

Machine Safety (Webbair):

- MC - Height Limiter.
- IMC - Height and Slew Limiter.
- IPD - Intelligent Proximity Detection.
